USA MADE

ATLANTIC GRAPHIC SYSTEMS

The powerfully advanced “Pro” controller brings state of the art technology to your copy center cutter. The new color touch screen tilts to adjust to the height of the operator and the touch screen interface responds like your cell phone.

Job programming that seemed daunting in the past is super simple with the Pro. Just give the cutter basic information on your job and it will take it from there. Cut location memory is always live, so you may simply cut your first sheet the way you prefer and hit the “make job” button – program ready!

The Titan 230Pro is NOW IN PRODUCTION and available for purchase!
